

JET WASHES

STANDARD WASHES & SNOW FOAM

Our bespoke Jet Wash solutions and forecourt bay design services are the perfect way to maximise your space.

CONTACTLESS

For mobile phone and card payments.

MULTIPLE MACHINE TYPES

Overhead booms and dedicated snow foam lance

LANCE & BRUSH

Mounted on 360° booms with dedicated holders, keeping hoses fully off the ground.

PURPOSE BUILT FOR YOU

Designed for a convenient user experience and maximum interaction. Our Jet Washes can be tailored to your business, whether you're looking to accept cash or card, and whether you want a standard car shampoo & wash solution or our exciting NEW Snow Foam.

KEY BENEFITS

SIMPLE CONTROLS

Simply pay for your time and operate our jet washes at a button push – designed for ease of use.

SAFE & QUALITY TESTED

Operate with peace of mind thanks to built in safety protocols and our in-depth quality checks.

BESPOKE BUILD

From snow foam to car shampoo, and payment options. Customise our units to your needs.

DESIGN SERVICE

Use our existing branding or leverage our design connections to custom brand your machine.

FLEXIBLE INSTALL

Whether you need a full bay set up or something that fits your existing site, we've got you covered.

VARIABLE PAYMENTS

Never miss out on a sale with both cash and card payment options available.

REVENUE SHARE

NO UPFRONT COST

We offer a high percentage revenue share option so that you can start earning immediately. The benefits of using our revenue share service are great for any business looking to avoid large upfront costs to upgrade your forecourt.

THE BENEFITS

- **Monthly Payouts**, instead of the quarterly payments our competitors offer.
- **Fast Callouts**, with a 99.9% first visit fix rate on all equipment and rapid response with 1 to 3 days.
- **Free installation on all equipment.**
- **Free labour & parts warranty.**
- **Free service & maintenance cover.**
- **Keep all on-site cash purchases**, and we'll offset it with card revenue to help you boost your cash flow.

COMPLETE SERVICE

Let us take care of everything, because when your location is profitable we both win. We'll work directly with you to maximise the space you have available and create an attractive, user-friendly jet wash, air & vacuum area.

Technical Specification

- Voltage: 230v (Single Phase) / 415v (Three Phase)
- Operating Pressure: 70 bar (230v)
- Water Tank Capacity: 20L
- Output Temperature: Cold water (10 – 15°C)
- Water Output: 13 LPM / 780 LPH
- Nozzle Size: 2505 / 2506

Installation Specification & Electrical Requirements

Jetwash – Single Phase Power

- Maximum Load: 20A
- Protection: 20A Type C single pole MCB in the mains distribution board
- Cable Specification: 3-core cable (Live, Neutral, Earth)
- Cable Size: To be determined by the installing electrician based on volt drop, cable length, ducting, and site conditions
- Connection: All units are internally fitted with isolators and RCDs. Only a tail end is required, with a minimum of 3 metres protruding from the ground or coiled neatly behind the unit location.

Tower Unit – Single Phase Power

- Maximum Load: 13A
- Protection: 16A Type C single pole MCB in the mains distribution board
- Cable Specification: 3-core cable (Live, Neutral, Earth)
- Cable Size: To be determined by the installing electrician based on volt drop, cable length, ducting, and site conditions
- Connection: All units are internally fitted with isolators and RCDs. Only a tail end is required, with a minimum of 3 metres protruding from the ground or coiled neatly behind the unit location.

Water Supply Requirements

- Pipework: 25mm – 15mm Speedfit pipe or equivalent
- Isolation: 15mm ball valve or tail ends if isolation is managed elsewhere
- Minimum Flow Rate: 13 litres per minute
- Minimum Pressure: 2 bar
